

Fireworks Cheat Sheet

These two pages are for you to keep handy when you are using **Adobe Fireworks** to create images. It will help you remember the settings and tricks you've learnt in this document.

Applying Masks

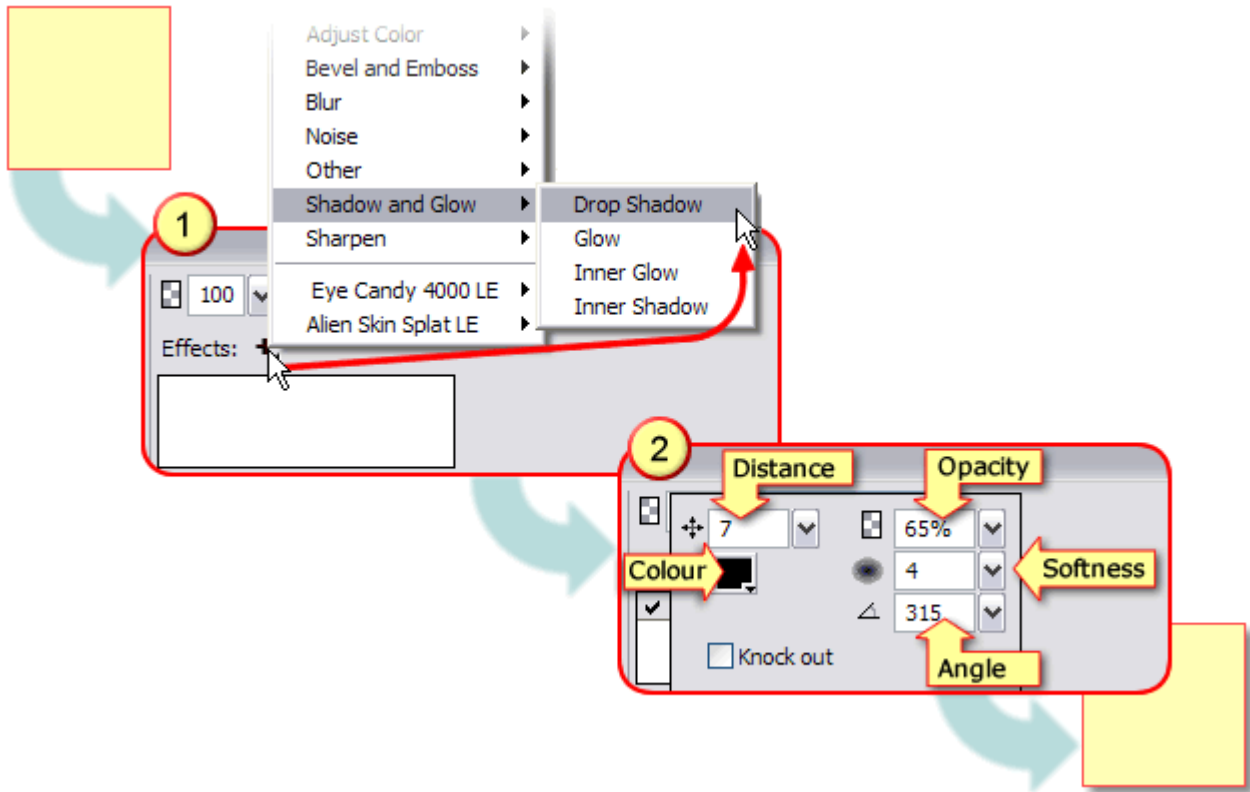

Remember

When applying masks, you need to draw a vector image over the top of the image you wish to mask and then **Copy** or **Cut** the image. See page 32 for more information on masking.

Drop Shadows

Apply a **Drop Shadow** by clicking the **+** button on the **Properties panel** and selecting **Shadow and Glow > Drop Shadow**. See page 35 for more information on drop shadows.

Text Box and Arrow Colours

See page 37 for more information on annotating your images.
